Dear ladies and gentlemen!

Zhambyl region is one of the most attractive regions of Kazakhstan for foreign direct investment. The region has a steadily developing economy, a growing GRP index, huge industrial potential and many investment opportunities for foreign investors.

In order to fulfill the instructions of the Head of State on Kazakhstan's entry into the top 30 countries of the Zhambyl region rating, work is being carried out to improve the business climate in the country and improve its position in the rating.

Investor support is the main priority of the state policy in the field of economic development, thanks to which all the necessary conditions have been created in the region for the successful work of investors and the development of entrepreneurship.

The favorable investment environment is confirmed by the interest and presence in Zhambyl region of foreign investors from more than 15 countries, including Germany, France, People's Republic of China, Russian Federation, Netherlands, Japan, Czech Republic, Italy, Iran, UAE, Malaysia, etc.

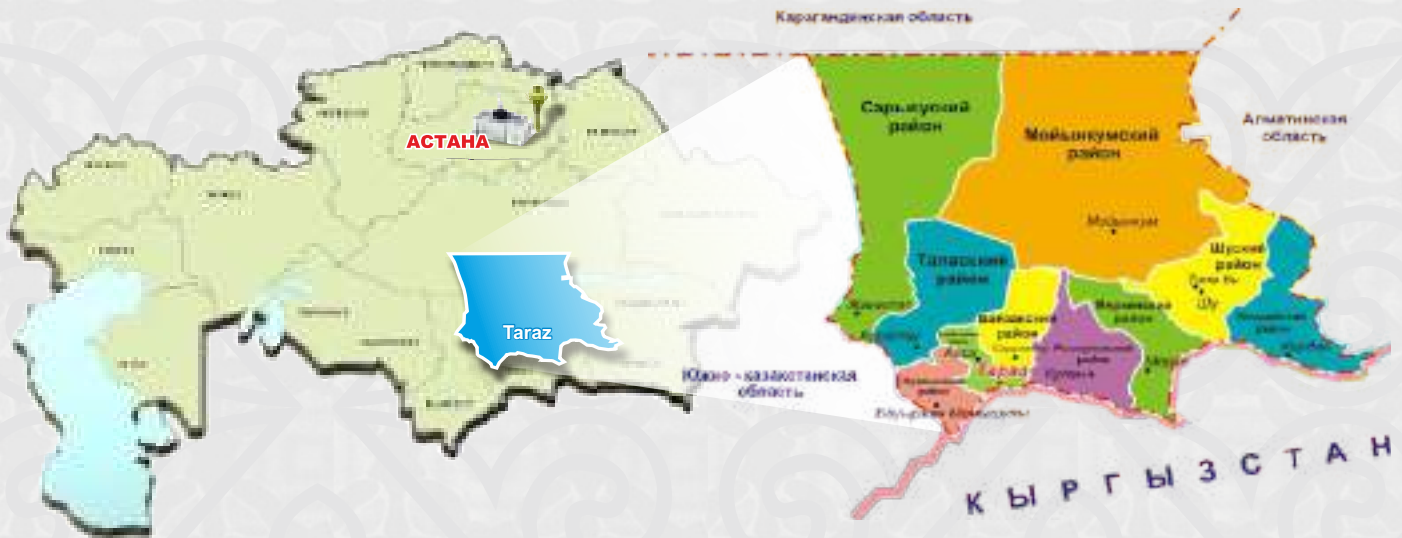

Zhambyl region is now on the way to realizing its true economic potential. It intends to become a place of concentration of investments that contribute to the creation of new jobs, technologies and ideas.

Using an advantageous geographical location, resource and agricultural-industrial potential, a developed diversified economy and other competitive advantages of the region, investors can become major suppliers of export-oriented and high-tech products with high added value.

Welcome!
Sincerely, Akim of Zhambyl region
**Karashukev
Yerbol Shirakpayevich**

Zhambyl region is located in the south-eastern part of Kazakhstan and borders Turkestan and Almaty regions in the west and east, Ulytau region in the north, and Kyrgyzstan in the south. Area of the region occupies 144,3 thousand square kilometers (5,3 % of the Republic total area), and includes 10 districts, 1 city of regional significance, 3 towns of district significance – Karatau, Zhanatas and Chu, and 379 settlements. Administrative center of the region is Taraz city.

Population amounts over 1,2 million people with 61% residing in the rural areas. Population is represented by more than 90 nationalities and ethnic groups.

Climate in the region is sharply continental. Average temperature in January in flat area is - 15 °C, in foothill area - 6 - 8 °C; in July + 16 °C + 24 + 25 °C respectively. Annual rainfall in flat areas amounts 300 mm, in foothill and hill areas fluctuates from 500 - 700 to 1 000 mm. Vegetation period in foothill and flat areas - 205 - 225 days.

Industry is one of the basic sectors of the economy of the Zhambyl region, which forms 21.9% of the gross regional product of the region.

Today, 846 enterprises operate in the industrial sector of the region, of which 14 are large, 21 are medium-sized, 811 are small and 45.7 thousand people are employed in the industrial sector.

The basis of industrial production is made up of 35 operating enterprises, including: 21 medium-sized, 14 large enterprises.

Thanks to the presence of mineral resources, the region has developed the mining, gas, chemical, food, metallurgical, construction materials, and electric power industries.

Mining and quarrying

The industry is predominantly represented by the mining of phosphorites, gas, coal, gold ores, lead concentrates, copper ore, raw materials for the production of construction materials and technical services.

Manufacturing industry

The basis for the diversification of industrial production and the dominant industry in the region is the manufacturing industry.

The bulk of those employed in industry are concentrated in manufacturing industries - more than 63.3% of all employees in the industrial complex or 27.3 thousand people.

The main branches of the region's manufacturing industry are the chemical industry (share of the industry in the manufacturing industry - 47.3%), food industry (share of the industry in the manufacturing industry - 19.1%), metallurgical industry (share of the industry in the manufacturing industry - 12 %), construction industry (share of the industry in the manufacturing industry is 9.6%).

The region maintains a positive pace of industrial production development. Enterprises of the Zhambyl region produce 100% of yellow phosphorus, 95% of phosphate fertilizers, 90% of gypsum, 62.2% of sugar, 12.5% of Portland cement of Kazakhstan.

OIL REFINING INDUSTRY

Gas production and transportation, production of gasoline, diesel fuel and fuel oil from liquefied gas and imported oil are performed in the region. Oil refinery products are obtained from gas condensate.

Gas production in Zhambyl region was commenced in 2003.

In January-December 2022, the volume of production amounted to 7,936.0 million tenge (2021 -14,240.5 million tenge), PVI – 114.0%. The share in the structure of the manufacturing industry is 1.3%.

The industry is represented by the Zhambyl and Talas branches of «Amangeldinsky Gas» Processing Plant LLP, which produces petroleum fuel, aviation gasoline, and fuel oil.

«Amangeldy Gas» Ltd

Legal address: 3d Korolev street, industrial ground 17, Karatau city

Tel: 8 (7172) 55-23-15

E-mail: amangeldy_gas@mail.ru

Web-site: www.amangeldygas.kz

Production: natural combustible gas for industrial and household use. Enterprise was established in 2003. KazTransGas JSC is the sole founder of the Company.

Pursuant to conditions of "Agreement of Operator Attraction" on August 15th, 2003 Amangeldy Gas Ltd is Operator of oil operations including those of maintenance and technical servicing of objects within contract area of KazTransGas JSC. Since 2003 Company has been dealing with servicing of Amangeldy gas condensate field.

Amangeldy field was discovered in 1975. Experimental and industrial maintenance of field was commenced on October 23rd, 2003, industrial development was started on December 14th, 2007.

Operating stock at the site includes 24 wells. Average well depth is 2 300m.

Enterprise staff currently consists of 200 people. Amangeldy Gas Ltd stably fulfills plans of hydrocarbons extraction. Special attention is paid to the production output that conforms to GOST 5542-87 «Combustible gases of industrial and household purpose» and TS TOO 39524618-01-2007 «Gas condensate at Amangeldy field». Quality of products is controlled by accredited chemical laboratory of the Company.

Up to 3000 million cubic meters of natural gas and over 200 thousand tons of gas condensate were extracted up to 01.09.2012.

Natural gas resource base is expected to increase by 45-50 billion cubic meters in the process of performance of scheduled geologic, prospecting and appraisal works. Stage-by-stage putting of field on line is to provide significant growth of extraction volumes and stable production through extended period and will approximately (minimum values) amount 500-600 million cubic meters/year.

Productive capacity 700 mln m³ natural gas, 110 thousand tonn condensated gas

Number of workers 160

THE MINING INDUSTRY

Mining complex is represented by enterprises that carry out mining and processing of gold, barite ores, manganese ores, gas. Positive trends in mining branch are based on increased mining of crushed phosphate, barite ore, crushed stone, successful mining of metal ores, manufacturing of oil products and other non-metal mineral products.

In the mining industry and quarry development, the volume of production amounted to 104 320.7 million tenge, the PVI was at the level of 99.5%.

The share of the industry in the industry of the region is 12.1%.

«AC Altynalmas» JSC

Tel.: 8 (7273) 50-02-00; 50-02-50; 50-02-22

E-mail: info@altynalmas.kz

Location of base: 1 Kuanyshbayev street, Akbakay village, Moiyunkum district, Zhambyl region

Property type: private

Products: Dore bars

Main activity of industrial complex is gold ore mining. Project capacity of mining and processing complex is 225 thousand tons of ore per year.

Main facilities:

- Underground mine Akbakay, section of open-pit mining that performs gold ore mining at Karyernoje field.
- Refinery of 1.0 million tons/year capacity;
- Dore plant “Dubek” for processing of gold concentrate of 12,0 millions tons/year capacity.

Annual production of underground mine Akbakay is 150,0 thousand tons annually. Annual production of open-pit mining section– 230,0 thousand tons of drudge for heap leaching.

New technology for processing of ore with low gold content – method of heap leaching applied to production since

August 2008. Hydrometallurgical complex for processing of drudge from Karyernoje field operates. Works on development of nearest gold ore fields Kenzhem and Svetinkoye are being performed.

Altynalmas JSC in 2011 implemented investment project

Productive capacity 1700 kg

On January 1st, 2023, number of staff: 1204 people.

«Vostochnoe Rudoupravlenie» LLP (East Mining Administration)

Address: Ulken village, Zhambyl district, Almaty region
Location of base: Shyganak village, Moiynkum district, Zhambyl region
Tel.: 8 (7277) 03-63-96; 8 (7272) 69-83-50
E-mail: office@barit.kz
Web-site: www.barit.kz

Products:

- crushed gravitational barite concentrate (packed into big bags of 1.5 tons capacity)
 - lump gravitational barite concentrate (0.20 mm) placer.
- Type of property - private.

Main activity of the Company is development of Shyganak field of barite ores.

Company is the largest manufacturer and supplier of high-quality gravitational Ala-Bar for oil and gas extraction companies in the Republic of Kazakhstan and the CIS countries.

For this purpose enterprise has sufficient production base – large Shyganak field of mono-barite ore located in Moiynkum district, Zhambyl region.

Field reserves under category B + C1 + C2 = 12917 thousand tons of ore (barite 9972 thousand tons). Project volume of ore mining at the quarry – 300 thousand tons annually.

Quality of gravitational barite concentrate obtained from monobarite ores at Shyganak field meets the requirements of both domestic and foreign consumers.

Main product of the Company is crushed barite concentrate KB-3. Product is famous for its high quality and technical characteristics and completely conforms to standard 13A API (American Petroleum Institute).

In 2011 the following systems were introduced at the enterprise:

- Environmental management system - ISO 14001 – 2004.
- HSE management - OHSAS 18001:2007.

In 2011 record amount of products was achieved: - 120 000 tons.

Vehicle park was updated with quarry, special and truck cars. Capacities of production were increased.

On January 1st, 2023 Company employs 189 people.

«Eurochim» LLP

Address: Sarysu district, Zhanatas, Aspandiyarov STR., 5
Tel: 8 775 030 51 18
E-mail: bortin1966@mail.ru

Eurochim is a global manufacturer and supplier of a wide range of mineral fertilizers and industrial products. The company's production assets are located on four continents, and its sales and distribution network operates worldwide.

Eurochim sales markets

The eurochima sales network covers five regions: Europe, Russia and the CIS, North America, Latin America and Asia. The work in these markets is managed by regional offices. The global sales network allows us to effectively serve customers in more than 100 countries around the world.

Products of the company "eurochim":

- * Fertilizers and ameliorants;
- * Industrial products;
- * Innovative products.

EuroChem Fertilizers produce phosphorite ore from the Kok-John and Himmelfarb deposits near Zhambyl region in Kazakhstan.

Design capacity: Production of crushed phosphate raw materials

Productive capacity 640 thousand tons

Number of workers: 240

«KATSA» LLP

Address: 17A Mambet Batyr str., Taraz, Zhambyl region

Tel: 8 701 101 96 76

E-mail: katsa@list.ru

Main activity: roduction of stone-gravel-sand mixture, asphalt and crushed stone. The production sites of the enterprise include: amangelydy field quarry, crushing and sorting site, asphalt concrete plant, road construction site. Manufactured products-asphalt concrete for road surfaces, crushed stone-sand mixtures-are in demand in terms of quality characteristics, which is evidenced by the number of contracts for the supply and shipment of products. Certification according to ISO standards allowed to stand out from other non-certified companies of the industry, making the quality of work popular in the market.

Design capacity: 160 tons/hour per year

Number of workers: 70

«Golden Compass Capital» LLP

Address: T. Ryskulovsky district, Kokkiya Field,

Office: 58a Zhandosov STR., Almaty;

Tel: 87272 502-044

Main activity: Mining of gold-containing ore, gold mining
Golden Compass Capital Joint Stock Company was established in 2008 in the form of LLC for the purpose of searching and analyzing projects in the field of exploration and production of gold. In 2012, Golden Compass Capital was reorganized into a joint stock company. The main activity of the company is gold mining and processing at the Kokkiya deposit in Zhambyl region.

* Main activities of the company:

Mining and processing of minerals, geological exploration work, exploitation work for the extraction of minerals.

Preparation, processing, sale of secondary raw materials.

Export and import of mineral processing products.

Export and import of precious metals and products made from them.

Investment activities and financial leasing.

Production and commercial activities.

Engineering, consulting, marketing and other activities.

Design capacity: 540 kg per year

Number of workers: 80

GOLDEN COMPASS

METALLURGY AND PRODUCTION OF METAL GOODS

Mining and processing of gold ore, metal smelting and production of metal goods are performed in Zhambyl region. The most significant sectors are production of ferroalloys, gold and gold concentrate.

In January-December 2022, the volume of production amounted to 81,933.1 million tenge (2021 – 78,470.1 million tenge), PVI – 95.1%. The share in the structure of the manufacturing industry is 13.3%. The main enterprises of the industry: LLP «Taraz Metallurgical Plant» for the production of ferroalloys, JSC «AK «Altynalmas», JSC «Golden Compass Capital» - for the production of precious metals (gold and silver), JSC «Spare part» - for the production of steel products. In January-December 2022, in physical terms, produced:

- ferrosilicon manganese – 24,667 tons (2021 – 36,812 tons);**
- gold – 2,285.5 kg (2021 – 2,221 kg).**

«Taraz Metallurgical Plant» LLP

Legal address: Taraz city, industrial zone
Tel.: 8 (7262) 94-12-50
E-mail: info@tmz.kz
Web-site: www.tnz.kz

Product: ferro-silico-manganese

Pursuant to program of diversification and introduction of new production in November 2006 by the decision of new owner, Central Asian Consulting Investment Company, plant was restructured for ferroalloy production and steel-making. Under production diversification program 11,5 billion tenge were invested.

In 2010 investment project of ferroalloy production of 72 thousand tons/year capacity was implemented – expansion and modernization of ferroalloy production, 300 work places were organized. On December 30th, 2010 act of state acceptance was signed. In 2011 two furnaces were introduced: May 8th – furnace #4, May 25th – furnace #3.

Productive capacity 72 thousand tons
Number of workers: 819

«Zhambylmetsnab» LLP

Legal address: Makhambet batyr street 2a, Taraz city
Tel.: 8 (7262) 34-43-74; 8 (7262) 34-33-59
E-mail: www.dosay2007@yandex.kz

Products: metalworks, door metalworks, stainless steel metalworks, frame metal structures, medium metal quantity metal structures, building metal structures, metal fences, roof covering, building enclosure net, steel square pipes.

Number of workers: 48

Zhambyl Plant of Metalworks «Imstalkon» LLP

Legal address: 178 Tole bi street, Taraz city
Tel.: 8 (7262) 57-59-57; 8 (7262) 57-59-58
E-mail: imstalcon_zhzmk@list.ru
Web-site: www.imstalcon.kz

Type of property: private

Products: metal works

Zhambyl plant of metalworks was established in 1967. Total capacity of plant in metal

works production is 30 000 tons, production area of enclosed space - 50 722 square meters. Since April 1st, 2010 branch of Zhambyl plant of metal works "Imstalkon" JSC was renamed Zhambyl plant of metal works "Imstalkon" LLP.

Plant has two powerful units for production of vertical steel reservoirs of 100 – 20 000 cubic meters capacity. Advanced technology of reservoir production out of rolled workpieces with laying of sheets with shift of vertical edges (similar to sheet assembly) that enables to significantly reduce terms and costs of assembly with maintained high quality and reliability of reservoirs.

Pursuant to stage 1 of Program for industrial and innovative development for 2004-2006 enterprise set forth as a priority output of competitive and export-oriented products as well as introduction of international quality standards. International quality system ISO-9001 was introduced to the plant with approval by certificate # 1493 on 30.01.07.

In 2007 environmental management system ISO 14001:2004 and H&S system OHSAS 18001:1999 were introduced and approved by certificate # 07.358.026 as of 5.06.2007.

Works have been performed on upgrade of equipment:

- Hot galvanizing, painting and drying shops were set in operation;
- Processing equipment was introduced – contact spot welding machine;
- HYBRID-200 gas-cutting machine was set in operation;
- 5 portable drilling and milling machines were acquired and set in operation.

Productive capacity 8 thousand tons

Number of workers: 300

«Factory of steel structures and tanks» LLP

Legal address: 5b Makhambet batyr street, Taraz city

Tel.: 8 (7262) 57-58-11; 8 (7262) 57-58-15

E-mail: zavod_zsk@mail.ru

Products: construction and technological metalworks;

- non-standard equipment, including all types of casings;
- vessels operating under pressure;
- oil and gas separators;
- drainage tanks;
- underground and ground horizontal steel reservoirs of 0.5 – 5.0 cubic meters including those of stainless steel;
- vertical steel reservoirs (PBC) of 100-50 000 cubic meters capacity by rolling method;
- storage tanks of 25 – 5000 cubic meters capacity;
- expanded steel sheets PV 408 -Pv510;
- manifolds and manifold stations;
- pig launchers;
- water towers;
- oil and gas equipment including dip holes, round holes, oval holes, light holes, uniform tank fill-up system.

Productive capacity 51,8 thousand tons

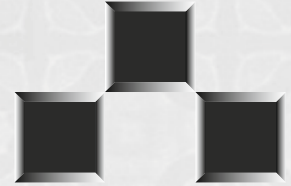

Number of workers: 105

«Zapchast» JSC

Legal address: Taraz city , Zhambyl avenue 5,
Tel.: 8 (7262) 57-58-11
E-mail: aozapchast@yandex.kz

Products: casting of ferrous metals scrap (production of spare parts for railway transport (brake blocks))

Type of property – private

Type of activity – foundry

Production capacity – 12 000 tons annually (6000 tons of steel, 6000 tons of cast iron)

Plant history started in 1938 when enterprise was named Dzhambul plant of tractor spare parts.

Plant capacity enables to produce up to 6000 tons of steel and cast iron items per year, plant has completely preserved production base and required equipment.

Three main shops operate:

- steel-casting shop;
- mechanic and press room;
- tool shop.

Series of auxiliary services is available:

- repair and mechanical;
- electrical repair section;
- transportation and storage section;
- central laboratory.

Warehouses block is connected with Buryl station by railway branch, there are internal railway networks to all shops with equipped loading and unloading grounds.

Enterprise has organized production of brake blocks for C and F carriage types, M type locomotives and hump brake shoes.

In 2010 investment project “Construction of electric and metallurgical rolled products mini-plant of 180,0 thousand tons capacity” was implemented at the enterprise. On December 30th, 2010 act of state acceptance was signed.

Products market: the Republic of Kazakhstan, NK KTZh Ltd.

Number of workers: 151

“Taraz Rebar Plant” LLP

Address: 080003, Taraz city, Zhambyl Avenue, 5;

Tel/f: 8(7262) 52-31-00

e-mail: aozapchast@yandex.ru

Type of activity – production of construction fittings

The project capacity is 200 thousand tons per year.

Taraz Rebar Plant LLP has launched a modern high-tech automated rolling line, which will allow the production of high-quality A-500 rebar with the possibility of import substitution and export to foreign countries. Upon reaching the production capacity, the company will produce 350 thousand tons of products per year. The new plant will provide replacement of 47% of rebar imports.

MACHINE ENGINEERING

Machine engineering products make out about 8% of total industrial volume. Enterprises of machine engineering produce: axle bearing, washing machines, lamps, lamp-bases and etc. Foreign investments are currently being involved in machine engineering for the purposes of new production including agricultural machinery, equipment for food industry, electric engines, and other goods of production and technical use.

In January-December 2022, the volume of production amounted to 16 421.6 million tenge (2021 -11 981.1 million tenge), PVI – 111.0%. The share in the structure of the manufacturing industry is 2.7%. Volumes in the industry are provided due to services for repair work in «Zhambylremservice» LLP, branches of «Kamkor Locomotive» LLP («Shu Locomotive Repair Plant») and «Taraz Locomotive Repair Depot»

Branch of «Kamkor Locomotive» LLP Shu locomotive plant

Legal address: 1 Parovoznaya street, Shu city, Zhambyl region
Telephone: 8 (72643) 2-11-89
E-mail: lrz_shu@mail.ru

Products: diesel bush D100, axle bearing
Type of property – private.

Diesel locomotive plant is structural subdivision of subsidiary of state enterprise “Zholdorremmash” JSC of National Company “Kazakhstan Temir Zholy” JSC. Since March 1st, 2004 enterprise was re-organized into Maxat A JSC, since January 1st, 2010 it was reformed into branch of Kamkor locomotive LLP Shu locomotive repair plant.

Enterprise occupies an area of 15 hectares. Main type of production activity is major repair of diesel locomotives of NK “Kazakhstan Temir Zholy” JSC as well as production and repair of spare parts.

Plant capacity in major repair makes out 7 diesel locomotives per month.

10 main shops currently operate at the enterprise:

- diesel locomotive assembly and testing shop;
- diesel shop of disassembly, assembly and repair of diesel;
- diesel-aggregate shop of diesel units repair;
- wheel-cart shop of disassembly, assembly, repair of carts;
- electric and machine shop of main generator and traction motor repair;
- repair shop of diesel locomotive auxiliary equipment repair;
- electric equipment and electric wiring repair shop;
- repair shop for anchors and main generator in KR-2 volume;
- diesel locomotive modernization shop;
- instrumentation and controls repair shop.

New technology of diesel-locomotive shunter assembly is currently being planned jointly with Chinese manufacturers.

New processing line layout for diesel-locomotive shunter has been developed.

First release of diesel-locomotive shunter was carried out in December, 2012.

Productive capacity 5 thousand

Number of workers: 525

Branch of «Kamkor Locomotive» LLP Taraz locomotive repair depot

Legal address: 81 Tynyshbayev street, Taraz city

Tel.: 8 (7262) 96-13-56; 8 (7262) 96-03-37

E-mail: tchr_zhambyl@mail.ru

Products: current repair and technical maintenance of locomotives

PHARMACEUTICAL INDUSTRY

In January-December 2022, the volume of industrial production of Zhambyl region amounted to 859.8 billion tenge, PVI – 110.2% by January-December 2021.

The growth of industrial production was ensured by increasing production in the manufacturing industry by 10.6%, in the supply of electricity, gas, steam, hot water and air-conditioned air - by 19.4%, in water supply by 3.5%.

«Superpharm» LLP

Legal address: Aisha-bibi village, Zhambyl region Tole bi Street 69
Tel.: 8 (7262) 54-47-20; 54-47-19; 8 (7263) 32-75-57
E-mail: superpharm@mail.ru

Products: sterile and unsterile single-use goods of medical purpose (clothes, surgical and bed clothing in sets and pieces for various medicine branches) (electronic version of products list is provided).

On November 4th, 2011 project “Construction of medical goods production plant” of 520,0 million tenge total value, 15 million pieces (or 1,0 billion tenge) capacity was implemented under the state program of forced industrial and innovative development.

Innovations in project: latest technologies were applied to production of medical clothes. Project is the sole in Kazakhstan. Demand of Kazakhstan for single-use medical clothing will be satisfied.

Technological equipment was imported from Germany, Turkey, Poland, Russia, and China. 18 types of machines produce 13 kinds of main products including packaging in sets. Procedure of state registration has been completed.

Number of workers: 270

«BM» LLP

Legal address: Zhambyl district
Phone: 87778058888

Main activity: Production of antiseptics, bioethanol and bioadditives
Design capacity 1500 tons of ethyl per year
Number of workers 25

«Amir & D» LLP

Address: Taraz

The main activities include the wholesale and retail sale of medicines and medical devices, the production of medical devices.

"Amir and D" LLP-produces the following types of products: rapid test for immunochromatographic analysis (including COVID-19 (4 types), syphilis, HIV, hepatitis B, hepatitis A, hepatitis C, rapid Kombotest for detection of TORCH infections (acute and chronic toxoplasmosis, acute and chronic rubella, acute and chronic cetamegaly), norovirus detection test, E. coli test, drugs).

Productive capacity: 15 mln products per year.

“Ersad-2021” LLP

Legal address: Zhambyl district, Aisha bi bi village, 68 Tole bi str
Phone: 8 (7263) 32-75-57
E-mail: superpharm@mail.ru

Ersad-2021 LLP has been operating on the market since 2021.

The company produces non-woven textile products — synthetic materials that are used in construction, medicine, automotive, agriculture, Spunbond - a very light, environmentally friendly, durable thermally bonded non-woven material made of the finest polypropylene threads. It is used as a replacement for more expensive materials. The main properties of the material are cheapness, high strength in the longitudinal and transverse directions, ease of cut, durability, environmental friendliness, thermal stability, isotropy and breathability.

Production capacity: 4.2 thousand tons per year.

CHEMICAL BRANCH

This branch provides 70% of region export and covers up to 40% of chemical products in Kazakhstan. Main enterprises of leader in chemical industry – Kazphosphate Ltd – are located in Zhambyl region. Implementation of new major investment projects of mineral fertilizers production by Evrochim Company (Russia) has been started and project Special economic zone “Chemical park Taraz” is being implemented by Joint Chemical Company Ltd of Samruk Kazyna Holding (caustic soda, chlorine, phosphorous trichloride, glyphosate and etc.).

In January-December 2022, the production volume of the industry amounted to 304,634.5 million tenge (2021 -199,792.2 million tenge), PVI – 107.7%. The share of the industry in the structure of the manufacturing industry is 49.3%.

«Kazphosphate» LLP

Legal address: 126 Abay street, Taraz city

Tel.: 8 (7262)45-23-69

E-mail: rahmanova.Z@kpp.kz

Kazphosphate LLP is a technological complex incorporating phosphate ore mining, its processing and production of finished raw material and products for chemical enterprises and consumers.

Products: fine phosphorous raw material, yellow phosphorous, phosphoric acid, sodium tripolyphosphate, ammophos, feeding tricalcium phosphate.

Company has the following branches in Zhambyl region:

1. Branch of Kazphosphate LLP – mining and processing complex Karatau
2. Branch of Kazphosphate LLP – mining and processing complex Chulaktau
3. Branch of Kazphosphate LLP - New Dzhambul Phosphorous Plant
4. Branch of Kazphosphate LLP – Mineral Fertilizers
5. Branch of Kazphosphate LLP - railway and transportation complex

On January 1st, 2023:

- Company's share in total production volume - 29,4%;
- Total number of employees in 5 branches - 7157 people.
- Design capacity:
 - Yellow phosphorus-84 thousand tons;
 - Orthophosphoric acid-120 thousand tons;
 - Sodium tripolyphosphate-120 thousand tons;
 - Hexametaphosphate-5 000 tons per year
 - Ammophos-180 thousand tons;
 - Tricalcium phosphate-72 thousand tons;
 - Superphosphate-80 thousand tons

The plant with a capacity of 15,000 tons of sodium cyanide per year. It is the first enterprise of the chemical industry in Kazakhstan that produces this type of product and is used in the gold mining industry and a number of other industries, which until now is an imported commodity. Today, it contributes to import substitution, as well as the development of exports of domestic products to the Russian Federation and the republics of Central Asia.

Due to the increase in demand for the products of Talas Investment Company LLP, the construction of the second stage of the sodium cyanide production plant is underway. The design capacity of the Plant will increase to 30 thousand tons per year.

Type of property: private

Construction of Zhambyl sugar plant was started in 1932 and on February 9th, 1937 first white sugar was produced. In February, 1956 sugar refinery was put in commission. Since 1982 technology of sugarcane raw product was developed.

In 1993 on the basis of Dzhambul Sugar Complex KANT open JSC was formed pursuant to the decree #1136 of the President of the Republic of Kazakhstan dd 05.03.1993 "About organization measures to reformation of state enterprises into joint stock companies". KANT JSC was registered on December 17th, 1993.

In January, 2012 Central-Asian Sugar Corporation Ltd became the new owner of the enterprise. Taraz Sugar Plant, branch of Central-Asian Sugar Corporation Ltd is the sole enterprise in Republic producing high-quality refined sugar (sugar of high treatment) and sugar products of wide range. Production capacity of sugar raw product refinery – 850 tons/day.

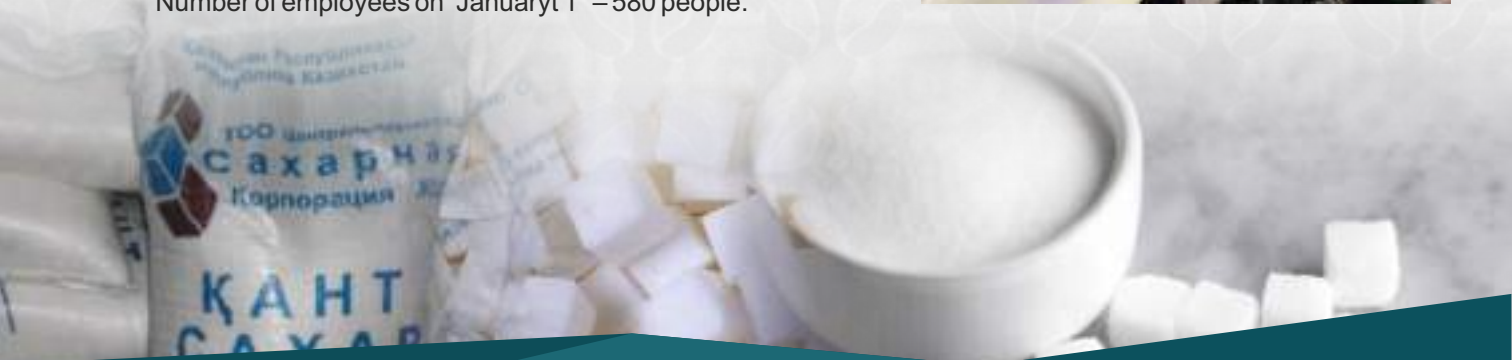

Range of products:

- Refined granulated white sugar in sacks of 10, 25, 50 kg;
- Refined pressed instant sugar "Shambon" of white, yellow, brown line, 1x1 sm cubicles in bags, 1 kg weight.
- Refined granulated sugar, white, yellow, brown, packed in paper bags of 1, 2 and 5 kg.

Sugar plant constantly undergoes reconstruction and upgrade of production sections, equipment, automation of processes, replacement of aged equipment, introduction of up-to-date technologies.

Design capacity 750 ton/day

Number of employees on January 1st – 580 people.

«Merke Sugar Plant» LLP

Legal address: 30 Revolutsionnaya street, Oital village, Merke district

Tel.: 8 (72632) 4-30-01; 4-30-03; 5-24-99

E-mail:mf.secretar@gmail.com

Type of property – private

History of the plant started in 1932 when Kirovograd sugar plant of Ukraine was relocated in Kazakhstan, Merke land, and in 1934 first granulated sugar was produced.

In 1962 first large-scale reconstruction of plant was performed, in 1964 new thermal power plant was put on commission as well as beet processing, juice purification and liming shops.

Plant stable operation continued until 1996. For the period of UUSR collapse enterprise stood idle until 2002. In 2002 plant was acquired by the Company “Asia Sugar”. Plant was restored within record short terms. 3.5 million dollars were invested in recovery works.

Merke branch of Central-Asian Sugar Corporation Ltd has the required technical and technological basis for refinery of both sugar beet and sugar cane raw product. In 2005 partial modernization of manufacturing scheme was performed that resulted in increase of raw sugar productivity from 500 tons/day to 650 tons/day. Production capacity of sugar beet refinery is 3000 tons/day.

Principal activity: processing of raw product and sugar beet.

Range of products: white granulated sugar packed in 50 kg, 25 kg, 15 kg, 10 kg sacks and molasses.

Design capacity 360 per day

On January 1st, 2023 number of staff – 200 people.

«Merke cheese plant» LLP

Legal address: 1st Lenin street, Oital village, Merke district

Tel.: 8 (72632) 2-17-02; 2-38-04

E-mail: merkedairy_8@mail.ru

Type of property: private

Products:

- hard cheese – «Kostromskoy», «Merkenskiy», Dutch, Russian, «Oital», «Assyl»

- cream cheese – «Yantar», «Druzhba», «Slivochniy», «Omichka», smoked cheese «Kolbasnyi».

- dairy products – 2,5% kefir, 3,2% kefir, 1% kefir, 15% sour cream, 10% sour cream, 2,5% biokefir, 4% fermented baked milk, 2,5% “Snezhok” drink, Kurt, butter “Krestyanskoye”.

History of Merke butter and cheese plant started in 1936, and in 1954 new shops were built. During the Soviet period plant processed more than 100 tons of milk per day, out of which cheese, dairy products and lactose were produced.

In 1996 Merke butter and cheese plant was reformed in Merke cheese plant open JSC, and in 2005 in Merke cheese plant LLP.

Enterprise is currently reviving old traditions, expanding range of products. Plant produces hard cheese “Kostromskoy”, “Dutch”, “Russian”, dairy products – kefir fermented baked milk, sour cream. Since 2003 production of cheese “Merkenskiy”, “Oital”, cream cheese, sour cream in tetra-packages was commenced.

In 2005 new equipment was purchased – melter for cream cheese and automated packaging machine for cream cheese and sour cream to be packed into cups. In 2006 new types of cream cheese “Druzhba”, “Omichka”, biokefir, dairy beverage “Snezhok” were put on production.

Since 2003 enterprise has been actively participating in international and republican exhibitions and several times was awarded with gold medals and diplomas for high-quality products.

Design capacity 1500 tonn

127 people are employed on January 1st, 2023.

«GOOD LOOK» LLP

Address: Taraz, Zhambyl Ave., 6,

Tel. 8(7262) 522706, 522920

E-mail: goodlook2015@mail.ru

Main activity Automated feed production complex

Design capacity 80.6 thousand per year.tons

Number of workers 15

“Good LOOK” LLP produces high-quality combined feed for all types of farm animals, birds and fish. Compound feed meets all the requirements of regulatory documentation. All manufactured products are certified.

LLC "GOOD LOOK" offers compound feed in free form, as well as in the form of sawdust and granules. The plant has equipment for cleaning barley, which allows you to reduce fiber and increase the digestibility of feed. Compound feed is produced in scattered or branded bags in a volume of 40-50 kg.

BUILDING MATERIALS INDUSTRY

Region has unique mineral and raw material base that proves sufficient number of raw materials for production of building materials, items and structures, enabling dynamic development of building materials production.

In January-December 2022, the volume of production in the industry was 49,207.9 million tenge (2021 – 45,717.2 million tenge), PVI – 97.2%. The share of the industry in the structure of the manufacturing industry is 8%

«Zhambygyps» JSC

Legal address: 116 Niyetkaliyev street, Taraz city

Tel.: 8 (7262) 34-06-65; 8 (7262) 34-43-13

E-mail: zhambylgips@rambler.ru

Web-site: www.gips.kz

Products: leveling gypsum filler “Gypsopolymer”, filler KR «Glaber» finish, gypsum, gypsum plasterboard

Year of establishment – 1961

Main activity: extraction of gypsum and production of building materials on gypsum basis.

Zhambylgips JSC is one of the most famous enterprises in construction industry of Kazakhstan, successfully operating in Central-Aisan and West-Syberian market for more than 45 years. Enterprise is the main manufacturer of binding gypsum in Kazakhstan. In 2004 German equipment of gypsum calcination process line was set in operation resulting in significant increase in gypsum production.

Gypsum is extracted on the largest field Ulken-Buryltau, occupying area of 56,3 hectares. With gypsum reserves of 15,7 million tons Company deals with marble extraction and its processing into marble powder. Building gypsum production capacity – 90,0 thousand tons annually.

In 2003 production of dry construction mixes increases year by year (capacity -25 000 tons annually). Consumers are attracted to quality of products that do not yield to the best samples of domestic and foreign manufacturers as well as to low prices.

In 2006 gypsum partition blocks plant of 300,0 thousand square meters annual capacity was started. Equipment for another crushing and sorting complex is being installed after introduction of which 300,0 thousand tons of gypsum ore (gypsum rock) are expected to be processed. In 2008 second gypsum plasterboard production line of 6.0 million square meters annual capacity was launched.

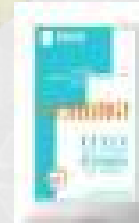

Gypsum plasterboard total capacity is currently 9 million square meters per year.

In 2007 SMK ISO 9001-2001 was introduced, products were awarded with honorable sign of environmentally friendly products.

Range of products at Zhambygyps JSC currently includes 15 positions: gypsum, plastering, spackling and finishing construction mixes, gypsum plasterboard, gypsum partition boards, lime, slag stone, marble powder and etc. Products are distributed in 50 cities of Kazakhstan and countries of near abroad.

Products: ready-mix concrete, road kerbs, road rings, subplates, piles, connection straps and other small goods.

Type of property: private.

Main activity: production of concrete beams, floor slabs and other structures.

Production capacity – 80-90 6-meter floor slabs or 83 cubic meters per day. New Spanish equipment Tensyland for production of slabs and other structures was delivered and put in operation. Floor slabs production shop was started in October, 2005.

Advantage of this technological cycle is in reduction of material capacity, labor intensiveness and energy consumption of manufactured unit, that enables to reduce prime cost and high quality is achieved by automated control system and high technology of concrete mix production of specific grades and class. Finished goods produced on equipment of this plant conform to international quality standards. More than 10 kinds of slabs are expected to be produced at the enterprise.

Set of new equipment also includes several attachments enabling to produce products of various kinds. Cost of each attachment – 40 thousand euro. Automated system of computer-based concrete mixing plant controls all technological processes of concrete production. Floor slabs are designed for unified estimated evenly distributed loads: 300, 450, 600, 800, 1 000, 1 250 and 1 600 kgs/sq.m.

Parameters of products: height of slab - 220 mm; width - 1200 mm; length varies from 2,4 to 9,0 meters. Cost of slab of PB-60–12-8 grade makes out 18 thousand tenge.

Reinforced concrete goods production shop has been operating since April, 2005. Production volume makes out 68 sq.m. and 20 running meters of kerb. 12 types of ceramic tile are produced.
